Education

•Bachelor of Science in Computer Science and Engineering *2023*
Daffodil International University CGPA: 3.54/4.00

Experience

•Software Engineer *October 2024 – September 2026*
Antopolis

- Contributed as a core member of the development team, working on scalable web applications using **Next.js**, **React**, **shadcn/ui**, **Express.js**, and **MongoDB**
- Planned, designed, and implemented new product features aligned with client and business requirements
- Built and deployed **real-world projects** including admin dashboards, dynamic content management systems, and customer-facing applications
- Followed best practices in **clean architecture**, **API integration**, and **state management** to ensure performance and maintainability
- Collaborated with the development team through planning and continuous integration workflows

•Full Stack Developer Intern *April 2024 – May 2024*
Qwik IT

- Completed a full-stack development internship, gaining practical experience in building and maintaining web applications.
- Worked with frontend and backend technologies to implement application features and support development tasks.

Projects

–VIPB Asset Management Company Ltd. *Live*
Jan 2026 – March 2026

* Developed a full-stack **Mutual Fund Investment Platform** with Individual, Joint, and Company investor accounts.
* Implemented **SIP and Lump Sum investments**, including automated recurring SIP installments.
* Built investor and admin dashboards for investments, withdrawals, portfolio performance, and transaction management.
* Generated PDF reports and tax certificates, exported records to Excel, and added weekly portfolio email alerts.
* **Technologies Used**: Next.js, React.js, Express.js, MongoDB, Mongoose, JWT, Recharts, Nodemailer, TanStack, Tailwind CSS.

–ICE Business Times *Live*
May 2026

* Developed a full-stack **business magazine platform** with a dedicated admin portal for managing articles, categories, authors, and digital publications.
* Built a comprehensive **Content Management System (CMS)** enabling administrators to create, edit, publish, schedule, and organize magazine articles efficiently.
* Implemented dynamic **article categorization, search, archive, and SEO-friendly routing** to enhance content discoverability and user experience.
* Designed secure **role-based authentication and authorization** for administrators, editors, and content managers.
* Developed scalable **REST APIs** and optimized database operations for high-performance content delivery and seamless frontend-backend communication.
* **Technologies Used**: Next.js, React.js, Express.js, MongoDB, Mongoose, REST API, Tailwind CSS, Shadcn UI, JWT Authentication, DigitalOcean.

Technical Skills

Programming Languages: TypeScript, JavaScript, Python, C++, C#
Frontend Development: Next.js, React, Zustand, Redux, HTML, CSS, Tailwind CSS, ShadCN, Framer Motion, GSAP
Backend Development: Node.js, Express.js, Nest.js, REST APIs, ASP.NET Web API, ASP.NET MVC
Database Management: MongoDB, PostgreSQL, Prisma, Firestore, Mongoose, TypeORM
Others: AI-driven development and engineering, CI/CD, Linux, DigitalOcean, Git, GitHub, Firebase, Agile Development, Vercel, Postman, Trello
